

## SWICON-2011 – INDEX

Sr. No.	Title of Paper	Author's Name	Page No.
<b>SESSION – I – USERS' FEEDBACK &amp; COMMON</b>			
1.	Design Considerations for UHV Hybrid Insulated Switchgear	GR Patel Kalpesh Chauhan Walter Holaus Uwe Riechert	3
2.	Integrating Environmental Aspect into Product Design and Development: Insulating Materials Perspective	Prashant B. Vairagi	8
3.	Testing of 800 and 1200 kV Class Circuit Breakers	R.P.P. Smeets S. Kuivenhoven A.B. Hofstee	15
4.	Study of Ablative Material & Their Influence on Arc Behavior in A Miniature Circuit Breaker Using CFD	Mahesh Ranade Amol Kale Abhimanyu Singh	21
5.	Breaker Conditioning Code – An Innovative Approach for Reliability Maintenance of Circuit Breaker	P.K.Pattanaik	26
6.	Diagnostic Analysis to Prevent Circuit Breaker Failures; Lessons Learnt from Practical Case Studies and Analysis Thereof	Vilas D. Sadegaonkar W.Z. Gandhare	32
<b>SESSION – II – COMMON</b>			
1.	High Voltage Testing of UHV Switchgears at CPRI, Hyderabad	Pradeep M. Nirgude K.A. Aravind G.V. Rao Subhash B. Ghole B. Krishna A. Yellaiah	41
2.	Zero-One Integer Programming Approach to Determine Minimum Break Point Relays in the Parallel Lines Network	Joymala Moirangthem S S. Dash Ramas Ramaswami	47
3.	Conformance Testing of IEC 61850 Communication Protocol in an IED – A Case Study	V. Shyamala K.V. HanumanthaRao	52
4.	Behavioral Modelling and Simulation of Magnetostrictive Based Tri-Metal	Rajesh Kumar Panda Manish Kumar Barun	57
5.	Experience In MV GIS Installations and Recommendations	M.R. Patel, Neelam Bhogal Neeraj Kulkarni	63
6.	Finite Element Method in Modal and Spectrum Analysis of the 145 kV Circuit Breaker Structure	Rupesh Daripa	67

<b>SESSION – III(A) – LOW VOLTAGE</b>			
1.	Comparison of Short Circuit Performance of Miniature Circuit Breaker (MCB) in AC & DC Circuit	G. Girija B.R.Vasudevamurthy H.S. Lokeshappa P. Sakthivel D.Krishnamurthy S. K. Das	73
2.	Design Optimization Through Simulation and Experimental Validation in Low-Voltage Switchgears	Alok Pande Narendra Akhadkar	78
3.	Tri-stable Compliant Circuit Breaker Mechanism	Yogesh N. Patil Suraj J. Ramchandani	83
4.	Discover the future of LV switchboard business thanks to the New IEC Standard - 61439	Julien Coulon Deepak Vaidya Kitkart Pitiwan	87
5.	Low Voltage Power Switchgear and Controlgear Assemblies as per IEC 61439-1 & 2: 2009	Goutam Som Y. I. Pathan H. K. Mishra M. K. Shah	92
<b>SESSION – III(B) – MEDIUM VOLTAGE</b>			
1.	Gas Exhaust Architecture in Medium Voltage Switchgear	Devraj Manna Vinodh Kumar M.G.	97
2.	Internal ARC Fault Simulation in Medium Voltage Switchgear	Arun Gupta Sujata Paranjape Mahesh Sonawane Ravindra Chikhale	102
3.	High Voltage precision Design for Compact MV Switchgear	Rupesh S. Rajhans Vishal Waghmare Avanish	106
4.	Ultra Fast Earthing Switch (UFES) for Active Internal Arc Protection in MV Switchgear	Dietmar Gentsch Subbiah Thevar Dukkaiapan	110
5.	Integrated Switching Device: an Innovative Substation Concept	Subbiah Thevar Dukkaiappan Ramesh Viswanathan Maheswaran Chandrasekaran	117

<b>SESSION – III(C) – HIGH VOLTAGE</b>			
1.	Controlled switching of high voltage circuit breaker	P. Rajpal A . P. Pandharkar N. Rao S. Shete S. S. Kale S. B. Potnis	123
2.	Controlled Switching of 1-PH Power Transformer – Effect of Residual Flux and Closing Instances	Kiran Kumar Munji Ravikumar Bhimasingu	127
3.	Controlled Switching of Transmission Line	Suhas Shelke M. Venkateswara Reddy Jashavant Patel	132
4.	Layout and Design aspects of EHV/UHV Gas Insulated Substations	D. Maheswaran Geetha Hariharan S. Arthanari	137
5.	Online Monitoring of EHV & UHV Breakers	Sanjay Kulkarni Shivanand Daddi	143
6.	Asset Management of EHV Equipments – SCHELOG Maintenance Software	Vivekanand Sindkar Shivanand Daddi	147
<b>SESSION – IV(A) – COMMON (HIGH &amp; MEDIUM VOLTAGE)</b>			
1.	Harmonization in Interpreting ANSI, IEC, is Standards for Electrical Power Equipment	G. Sen Gupta J. Santhosh T. Gurudev B. V. Govindappa	155
2.	Performance Evaluation Of $W_o_2$ Doped $Ag-Sno_2$ Contacts Prepared by Powders Processed through Electrochemical Route	S. S. Godkhindi G. S. Grewal P. B. Joshi M. Ramamoorty T. P. Govindan	160
3.	Modeling of the Near Electrode Physics for Simulation of Arc in Switcgear Devices	Kedar R Purandare Shankar Bandari Md Naim Ahmmed	165
4.	Vacuum Circuit Breakers - User's Experience & Expectations	Y. V. Joshi	170
5.	Up-Gradation of Systems in Iron & Steel Industry	D. Maheswaran K. K. Jembu Kailas V. Rangaraj W. Adithya Kumar	176

<b>SESSION – IV(B) – HIGH VOLTAGE</b>			
1.	A Novel Approach to Modelling & Analysis of Very Fast Transients in EHV Gas Insulated Switchgear	Yaswanth Vadrappalli Urmil B. Parikh Kalpesh Chauhan	183
2.	Switching Induced Transient Voltages in Control Circuitry of High Voltage Gas Insulated Substations	M. Mohana Rao	191
3.	Analysis of Potential Distribution of 1200kv ULTRA-High Voltage Lightning Arrester	Saravanan Selvaraj Nitin Jha D. John Yesuraj	197
4.	A Study on Effect of Various Parameters on Gas Blast Characteristics of Two-Stage Blast Interrupters	M. Mohana Rao H. S. Jain Neelam Bhogal	201
5.	Single Pole Auto-Reclosing in Reactor Compensated EHV and UHV Transmission Lines	Bandaru Kondala Rao Jashavant Patel Pavan Kumar Puvvada	206
<b>SESSION – V(A) – LOW VOLTAGE</b>			
1.	Focus on Increasing Efficiency of Installation & Maintenance	Eckard Eberle Stephan Faber Sachin Salaskar	217
2.	Implications of IEC 61439-2 on LV Switchgear & Controlgear; Testing, Application and Reliability	Rob Swann Craig McKee	221
3.	iPMCC is not only a Switchboard	Daniel Barstz Deepak Vaidya Dominique Villard	227
4.	Personal & Installation Safety-Internal Arc containment in LV switchboards	Deepak Vaidya Jean-Luc Zenone	232
5.	A Simulation and Experimental Based Study of Aluminium Busbars in LV Switchboard	Gautam Lalankere Manan Deb	237

<b>SESSION – V(B) – MEDIUM VOLTAGE</b>			
1.	Arc Modelling in Circuit Breaker	Mrunal G. Parekh H. A. Magalvedeker S. Bindu	245
2.	Dynamic Modelling and Analysis of Magnetic Actuator Using Finite Element Method	Mohammed Fazil Kalpesh Mandlik	249
3.	Design Optimization of MV VCB through Dynamic Simulation & Finite Element Analysis	Ninad Chandorkar Deosharan Roy Shantanu Kulkarni Yogendra Joshi Ajay Kahane	253
4.	Modeling of Vacuum Circuit Breaker and its use for Studying Reactor Switching	Prashant V. Navalkar Gopal Gajjar	258
5.	Performance Study of Circuit Breakers for Inductive and Capacitive Current Switching	Rajaramamohanarao Chennu S. Sudhakara Reddy V. S. Nanda Kumar M. Chandra Sekahr Maroti G. Sen Gupta	263
<b>SESSION – V(C) – HIGH VOLTAGE</b>			
1.	Application Of Vacuum Circuit Breaker at Transmission Voltages: A Brief Review	Sandeep Kulkarni M. Hemachander Srinivas Rayudu Arun Kumar	273
2.	Diagnostics and Condition Monitoring of EHV/UHV Circuit Breakers	Vivekanand Sindkar Bhagatsingh Vibhute	276
3.	Dynamic Behavior of Pre – insertion Resistors and Control of Voltage and Current Transients	GR Patel Michael A Lane C. Kurinko	280
4.	Optimization of High Voltage Arc Assist Interrupters	G.N. Patil H.C. Joshi A.P. Pandharkar S.S. Kale S.B. Potnis	283
5.	Assembly Of High Voltage Devices: The Pass Case	R.Cameroni C.Granata L.Calamari P.Gatti	287
6.	Defining Reliable & Energy Efficient Disconnectors	GR Patel Raje Shethwala	294

SESSION – VI – COMMON			
1.	Testing of SF <sub>6</sub> and Vacuum Generator Circuit Breakers	R. P. P. Smeets L. H. te Paske	299
2.	Dielectric Design Optimization Using Finite Element Method Analysis	Rajesh K.N. Devraj Manna	305
3.	Energy Saving through Isolators Smart Grid Approach	Y. V. Joshi	310
4.	Behavioral Modelling of Composite Material with Capricious Thermal & Magnetic Behavior	Rajesh Kumar Panda Manish Kumar Barun	314
5.	Design & Type Testing Requirements for Reliable Operations of 800kV GIS	Zhang Meng Shen Chunhong Ma Zengrui Mu Shuanglu	319
